

The FCC should not be at the bequest of corporate America. The FCC should stand for the rights of citizens in this country. The content comes into our homes, why should we not be able to make a copy of it for archiving? Why would movie studios send such signals in the first place if they didn't want us to be able to use them as we see fit? We are serving their purposes when we tape something. The content is maintained in the same format it was sent to us. Would that not constitute fair use?
